

Adding a frame

When your painting has dried, it's time to frame it!

Materials:

- One-sided sticky plastic
- Sheet of coloured card
- Double-sided tape

What to do:

Start by covering the painting in a sheet of one sided sticky plastic, give yourself a bit of a border and fold around the back of the painting.

Next, get your coloured card and cut it so it is the same size as your painting but with a smaller window cut out of it (this will be where your painting shows).

Line the 4 borders of the back side of the coloured frame with double-sided tape, peel off and stick on to your painting. Your painting is now ready to put on display!
